

METAL COMPONENTS

CAF's needs

Manufacturers supplying metal components for rail vehicles such as trains, trams, and metro units.

Scope of interest

Items made of steel, stainless steel, aluminum

- Railings (powder-coated or brushed)
- “Snow-plug,” bumpers, crash box
- Roof boxes
- Fairings – liquid paint finish
- Small parts: laser cutting, bending, powder coating
- Bushing, turned parts
- Aluminum castings and forgings
- Rolled bending of thick sheet metal
- Punched sheet metal (subcontractor for our suppliers)
- Bending of very thick tubes (exhausts, cooling systems)
- Profile machining with long term storage + powder coating
- Bogie flaps – welded, glued, wet-painted
- Luggage racks (large)
- Air tanks, pressure tanks

Certifications

- EN 15085 - railway standard for welding
- DIN 6701/ EN 17460 - railway standard for bonding
